

DT

DT Intent Statement

Design and Technology at St Jude's provides the means and opportunity for children to solve problems using their creativity, imagination and design skills.

The children make relevant products within a variety of contexts and a range of materials, including food.

Design and Technology develops practical skills using an array of tools, thus increasing confidence and self-esteem as well as learning essential life skills and managing risk.

Children are encouraged to reflect on and evaluate their own designs and those of others and make modifications where necessary.

Design and Technology is a practical and valuable subject that is accessible to all learners. Children acquire a broad range of subject knowledge and draw on disciplines such as mathematics, science, engineering, computing and art.

YEAR	AUTUMN 1	AUTUMN 2	SPRING 1	SPRING 2	SUMMER 1	SUMMER 2
